

Baryta Photographique 310 gsm

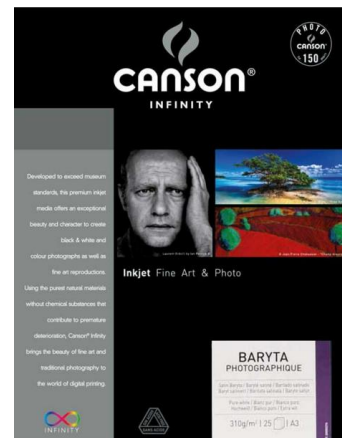

Canson® Infinity Baryta Photographique is a true Baryta paper developed for inkjet technology. It consists of an alpha-cellulose, acid-free pure white paper with the same barium sulphate coating as for traditional silver halide and a premium inkjet colour receiver layer.

Canson® Infinity Baryta Photographique offers the look and aesthetic of the original darkroom baryta print and complies with the ISO 9706 standard for maximum longevity.

This museum grade photo paper shows excellent black density and great image sharpness, making it ideal for black and white photography.

Specifications:

-  **Weight:** 310 gsm
-  **Thickness:** 310 µm
-  **Extra smooth**
-  **Satin**
-  **Composition:** 100% alpha-cellulose
-  **CIE whiteness:** 99,16
-  **Internally buffered**
-  **Acid free paper**
-  **OBA :** very low
-  **Immediate drying time**
-  **High water resistance**
-  **Paper base meet the requirement of ISO 9706**
-  **Contains barium sulphate**
-  **Optimised for pigmented inks. Compatible with dye inks.**

Testimony / Ian Patrick:

<< Ever since I began using Canson® papers back in 2006, I have enjoyed the excellent perennial quality of their products. When I made my first print on Canson® Infinity Baryta Photographique paper I was amazed by the results. I put it side by side it to a silver print and saw how great the paper is. My printing results on the Canson® Infinity Baryta Photographique paper were so good that just about all the people I showed them to had no idea they were not on silver paper ! >>
